In a dynamic panel, a range of academic experts and German business leaders in the U.S. discuss opportunities for those interested in academic exchanges or careers at U.S.-based German companies.

UAS7, an alliance of seven German Universities of Applied Sciences, in partnership with Hochschule Bremen (HSB), one of its members, will bring its unique expertise in applied science education to the University of Alabama in Huntsville.

We invite students, alumni and U.S-based German businesses as well as interested parties to join us for the event.

The event will conclude with an informal reception.

RSVP kindly requested to: info@uas7.org

Wunderbar Together

This evening kicks off a series of five events within Wunderbar Together, the Year of German-American Friendship 2019. Learn about Germany’s leading role in university-industry collaboration, dual-study programs, apprenticeships, and educational concepts of applied teaching and research.

Since its founding in 2005, UAS7 — an alliance of seven German universities of applied sciences — has established itself as a leading network of expertise in teaching, research, professional know-how, and combined organizational resources. UAS7 maintains and expands a truly international network of partners to promote academic exchange through student mobility and joint research projects. We deepen business relationships for knowledge transfer and provide internship placement and career support for international students. UAS7 also supports our member universities as they work to establish joint degree programs and global-oriented graduate schools at the highest international standard.
